

Heating Cooling Mixer

with **Vertical Cooler**

CONSISTENTLY HIGH PRODUCT QUALITY | SHORT PROCESS CYCLES | EASY CLEANING

HM+KM V Hot & Cold Mixing Combination

All Advantages at a Glance

- Process-optimized mixing tools for optimum energy input
- Innovative aspiration for optimum dehumidification of the mixture
- Easy and quick cleaning via the opened swivel lid

An **Economic** and **Reliable** Mixer Solution

In the vertical cooling mixer, the material to be mixed is cooled by gentle material circulation on a cooled surface. A targeted water supply in the mixer bottom and in the side wall ensures optimum cooling performance of the mix. After completion of the mixing process, the cooled mix is quickly discharged via the contour-shaped outlet.

Technical Data

HM+KM H Combination Heating Mixer HM + Vertical Cooling Mixer KM V	RIGID PVC OUTPUT (B.D. 0.5 kg/l)			SOFT PVC OUTPUT (B.D. 0.5 kg/l)		
	Heating Temp.: 120 °C Cooling Temp.: 50 °C (*40°C)			Heating Temp.: 120 °C Cooling Temp.: 60 °C (*50°C)

Attention to Details

Solutions to Maximize Your Production

Heating Mixer HM

Type HM	Total Volume	Usable Volume	Motor Power	Boost Motor Power
	liters	liters	kW	kW
HM 200	200	170	45	55
HM 300	300	255	75	90
HM 400	400	340	90	110
HM 500	500	425	110	132
HM 600	600	510	132	160
HM 700	700	595	160	200
HM 800	800	680	200	250
HM 1000	900	850	200	250

Due to its unique design, the MIXACO hot mixer combines high throughput with fast homogenization and heating.

Vertical Cooler KM V

Type KM V	Total Volume	Usable Volume	Motor Power	Boost Motor Power
	liters	liters	kW	kW
KM 800 V	800	480	7.5	11
KM 1200 V	1200	720	11	15
KM 2000 V	2000	1200	18.5	22
KM 2600 V	2600	1560	22	30
KM 3700 V	3700	2220	30	37

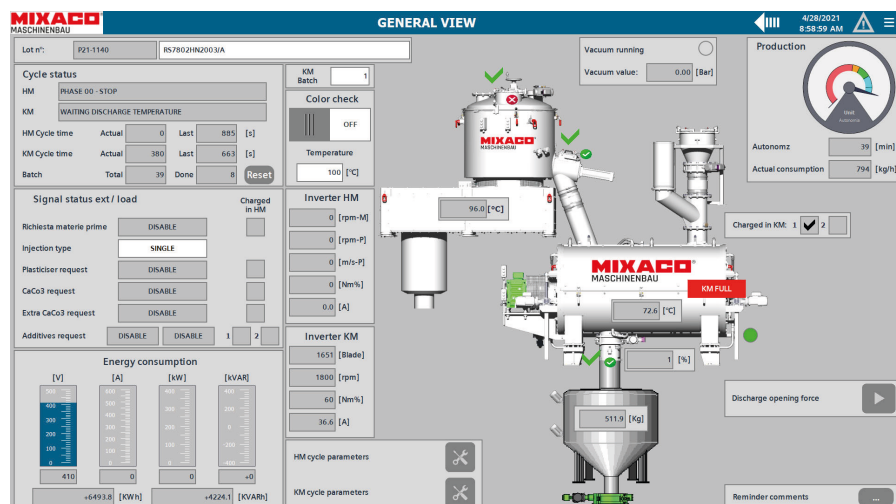

Thanks to the high surface area of heat exchange (vessel + sides + lid), and the action of the main agitator that ensures an intense contact of the dry-blend with the exchange surface, coolers KM V guarantee the lowest final cooling temperature so as to be able to store dry-blend into intermediate storage silos thus avoiding the formation of lumps due to thermal inertia of the dry-blend.

HM+KM V Hot & Cold Mixing Combination

All surfaces in contact with the product are made of stainless steel finely polished to provide easy cleaning and to prevent the buildup of material.

Visualization

The informative and clear MIXACO process visualization on the operating panel ensures that the entire combined heating-cooling mixer can be safely and reliably operated.

Control

- Siemens S7-1500 PLC: Meet today's requirements for safety, efficiency and cost-effectiveness
- Remote maintenance module enables fast and secure access
- The informative and clear MIXACO process visualization on the operating panel ensures that the entire combined heating-cooling mixer can be safely and reliably operated
