

# Universal Mixer M H

HIGH EFFICIENCY COOLING

Universal Mixer M H

## All Advantages at a Glance

The new M H high efficiency universal mixers are designed to give the best performance in homogenization and dispersion of powders.

Thanks to the interaction of main agitator and chopper, the mixer can ensure highest quality in short time. Universal Mixer M H guarantee gentle preparation of the blend and due to many options available the mixer can be optimized to many processes.

## Technical Data

Type M H	Total Volume	Usable Volume	Batch Size	Motor Power
	liters	liters	kg	kW
M 800 H	800	480	240	15
M 1200 H	1200	720	360	22
M 2000 H	2000	1200	600	30
M 2600 H	2600	1560	780	37
M 3700 H	3700	2220	1110	44
M 5000 H	5000	3000	1500	75
M 7000 H	7000	4200	2100	110
M 9000 H	9000	5400	2700	132

## Custom Solutions

Additional sizes and execution available on request. Get in touch!

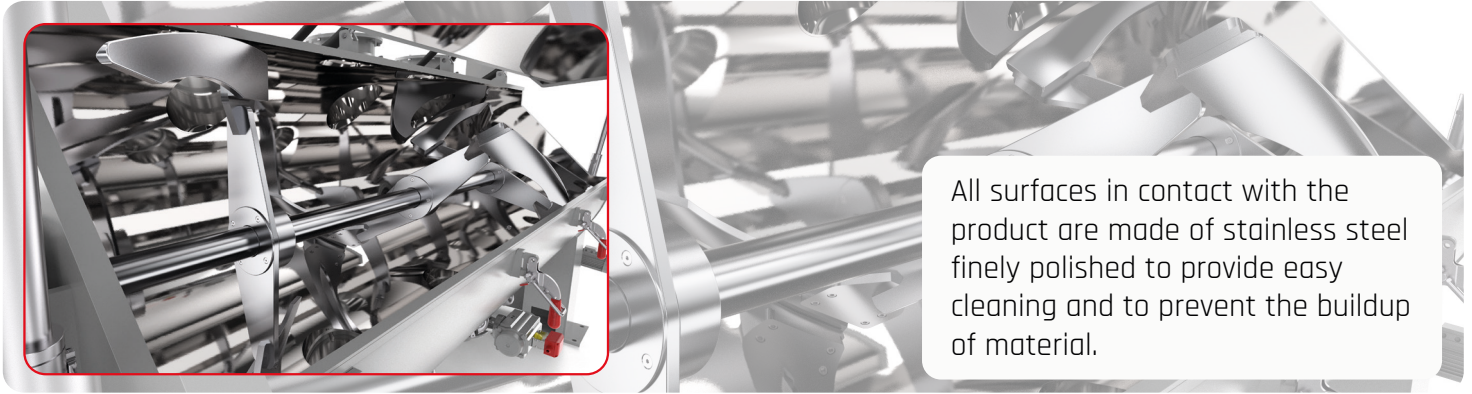

**Parameters** Bulk Density: 0.5 kg/l Filling Level: max. 60 %

The data shown in the tables are indicative and must be confirmed by MIXACO Maschinenbau.

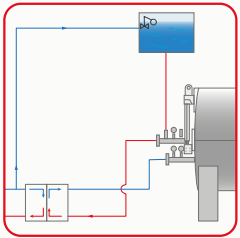

# Attention to Details

Solutions to Maximize Your Production

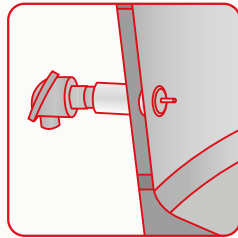

## Accessories

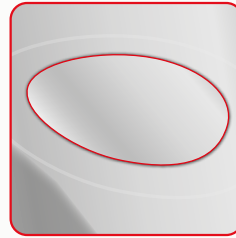

Extract of Additional Expansion & Options

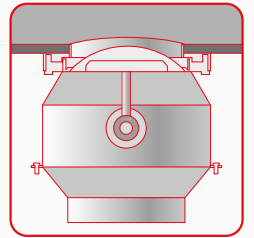

Closed Loop Heat Exchanger

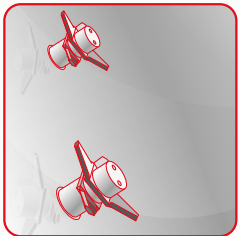

Wear Resistant Probe

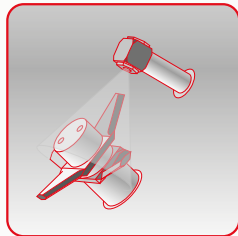

Contour Shaped Valve

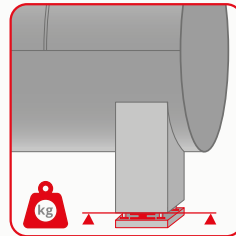

Semi-Spherical Valve

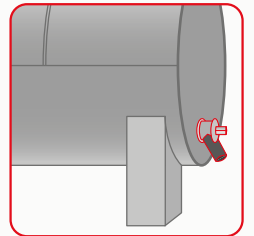

Choppers

Liquid Spraying

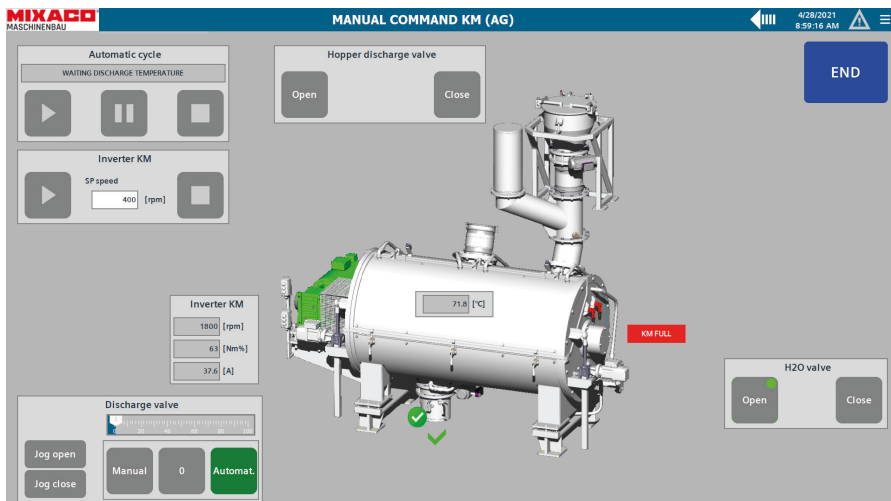

Cooler Weighing

Sample Pickup

## Visualization

The informative and clear MIXACO process visualization on the operating panel ensures that the entire Universal Mixer M H can be safely and reliably operated.

## Control

- Siemens S7-1500 PLC: Meet today's requirements for safety, efficiency and cost-effectiveness
- Remote maintenance module enables fast and secure access
- The informative and clear MIXACO process visualization on the operating panel ensures that the entire Universal Mixer M H can be safely and reliably operated
