

# Screw Feeder

## DDSR40 2.0 (AC)

Volumetric and Gravimetric

### General Information

The [DDSR40](#) feeder is ideal for difficult flowing, sticky or floodable bulk ingredients at medium feed rates.

The feeder has the following main components: A stainless steel screw trough with inspection opening, a modular gear block, a two-part agitator in the screw trough, a three-phase motor to drive the agitator, a double screw, a three-phase motor for driving the screw, a screw tube, an extension hopper with a capacity of 35 dm<sup>3</sup> (1.2 cuft), 60 dm<sup>3</sup> (2.1 cuft), 110 dm<sup>3</sup> (3.9 cuft) for storing bulk material. For caking bulk solids, which tend to solidify and bridge when at rest in the hopper, a 100 dm<sup>3</sup> (3.5 cuft) hopper with an agitator (AR) can be used.

The horizontal agitator works to consistently fill the screw and prevents hopper bridging while providing mass flow. This results in optimal feeder accuracy and control.

The DDSR40 is easily disassembled for wet or dry cleaning. All service is from the front or back.

The gravimetric version includes the [weighing systems](#) DLS5, DLS6, MD4, MD5 and MD6 featuring a high resolution digital load cell with serial data transmission as well as a MS5 and MS6 with strain gauge load cell with advanced filtering technology.

The unit conforms to CE directives.

### Model Specification

Screw drive	Three-phase motor
Drive power	0.37 kW (0.5 HP)
Screw speed	374 min <sup>-1</sup>
Optional Screw speed	282 min <sup>-1</sup> / 142 min <sup>-1</sup>
Trough agitator	yes
Agitator drive	Three-phase motor
Drive power	0.25 kW (0.34 HP)

### Control Modules

Control and speed modules are offered either mounted onto the feeder ([Congrav® CM-E](#)) or are available for mounting in a separate control panel ([Congrav® CB-E](#) or [Congrav® CB-S](#)).

Controls can communicate directly to most host/ PLC systems or to Brabender Technologie Congrav® Operator Interfaces.

\* Theoretical values at 100% screw filling level and motor speed. Depending on the flow characteristics the screw filling level may decrease to 50%. Further limitations have to be considered for gravimetric feeding, as max. speed should be reduced to allow for bulk density variations.

* other values upon request	** 3 phase motors are designed for a power supply of: 230/400 V, 50 (60) Hz, and for the operation in TT networks, TN networks or networks with earthed neutral conductor. For different networks adaptation measures are necessary.

### Options and Accessories

- Flexible [inlet and vent connections](#)
- Flexible [outlet connections](#)
- Interchangeable screws and screw tubes
- [DESTACO clamp fasteners](#) with safety switch
- Versions for higher and lower temperatures
- [Explosion-proof executions](#) as per directive 2014/34/EU (ATEX) or NFPA
- Vertical outlet with [quick release](#)
- [Maintenance disconnect box](#)
- [Filter bag](#) or [JetFilter](#) for vent pipe
- [Turntable, cart mounting, BagDumper](#)
- Pressure compensation for the [outlet](#) and the [feeder hopper](#)
- Cleaning and refill systems upon request
